National Institute of Technology Durgapur

2022-26

CGPA: 7.66

PERSONAL PROJECTS

•Job Portal

Built a Job Portal web application using MongoDB, Express.js, React.js, and Node.js (MERN stack).

- Created separate dashboards for job seekers and employers using React.js and handled routing with React Router.
- Used Node.js and Express.js to build RESTful APIs for job posting, application, and user management.
- Stored user data, job listings, and applications in MongoDB, and implemented JWT authentication for secure login.

•Deepfake Detection using Long-Distance Attention

Developed a full-stack deepfake detection web application using Python, Django, HTML, CSS, and JavaScript.

- Integrated a deep learning model with Long-Distance Attention in the Django backend to detect deepfake videos
- Designed a user-friendly frontend using HTML, CSS, and JavaScript, allowing users to upload videos and view detection results.
- Used Django ORM with MySQL (WAMP Server) to store user data, video records, and detection outputs securely.

•Weather Seeker

A web app which gives the weather information of the location searched by user.

- Crafted a weather app that dynamically adjusts its background to match the searched location, seamlessly merging functionality with visual appeal.
- Successfully integrated two distinct APIs, OpenWeatherMap and UnsplashImages, into a unified, responsive web application.
- Technology Used : JavaScript , CSS, HTML, API.
